What's New In?

System Requirements:

Connecting a client to a server is not a simple task. If you are connecting to a server that is connected to another server on the internet, it is more difficult and will require additional steps on your part. We will show you how to accomplish this task by using the following steps: 1. Ensure that you have a stable internet connection that will keep a steady stream of packets. A few hours without internet could cause problems. We are going to use to test our internet connection.
