Use the Markup Assistant to add more than 350 pre-defined markup symbols to your drawing, or create your own. (video: 1:13 min.) 3D Conics: Get precise, accurate modeling by converting 2D and 3D drawings into DWG files. Draw a 3D surface with the 3D Conics tool and convert it to a DWG file. (video: 1:44 min.) Unique 3D modeling: Use the new merge feature to combine 2D and 3D models into one single 3D model. (video: 1:20 min.) Graphical Styles: Add graphical styles to your drawings. Apply two styles to one element to create the appearance of textured or painted surfaces. (video: 1:29 min.) Package Manipulation: Automatically merge multiple packages and place them into the correct folder. Create a folder and open packages into that folder. (video: 1:43 min.) Surface Analysis and Boolean Tools: Use the new surfaces feature to quickly generate surfaces for 3D models, or use the 3D surface tools to analyze a 3D model. (video: 1:42 min.) Contour tools: Define your own shapes or draw with commands, and let AutoCAD create the contours for you. Create your own shapes and the contours will be automatically generated. (video: 1:35 min.) Angle commands: Add angle commands to your drawings. Use the standard 90-degree angle, or the alternate method for defining angles: set a fixed distance from a given point. (video: 1:19 min.) Sketchpad: Create line and curve sketches with the new pen tool. (video: 1:42 min.) Net shapes: Add net shapes to your drawings. Create net shapes from AutoCAD objects, or create net shapes from text. (video: 1:20 min.) Dynamic Filters: Use filters to apply specific attributes to your drawings. (video: 1:14 min.) Translate tools: Use the new tools to translate objects and parts, or draw freehand with the polyline tool. (video: 1:20 min.) XML Plug-ins: Update your customizations to an XML file, which
