Ocean Optics, and more than 5,000 biomedical devices with PIEÂ . The Ocean Optics S2000 refers to the mechanical setup on the Ocean Optics bench top. Ocean Optics S2000-blue, 7-channel beam splitter. Ocean Optics.Q: Translate Azure CLI to Azure Service Fabric SDK I am attempting to convert a powershell script that uses the latest Azure Service Fabric SDK to the Azure CLI 2.0. So far I have converted the Azure Service Fabric SDK to Node.js and then used the azure-arm-module from there to build the script. I am currently stuck on the first step - converting the script to Azure CLI 2.0. Is there any documentation or what is the best way to achieve the same result? Note - I am building the script as a one-off, and if there is a way to trigger a deploy from the script that would also be acceptable. A: This is the final script that I have created and it works. az vm create -n test1 --resource-group myResourceGroup --image-id 1.3.512-vhd-13.04.17.1 --size 1 --admin-username adminuser --admin-password secretpassword az app service fabric create -n test1 -g myResourceGroup --slot 2 --type nodejs az vm create -n test2 --resource-group myResourceGroup --image-id 1.3
