Sophie's Dice (or Sophie Dices Mortelis, Simplicibus Somnimaaculis, and Il Fortuna Mortale) are small tally marks shaped like dice made by the medieval French artist Jacque Majolle. Description The day of the count of Normans. So how do you throw the six-sided dice, the irregular and unnumbered Pelica, that has a name for the spirits during the holidays? My answer, from losing or winning fortunes: the surprising truth of this: "Chance rules. Become ashamed, / Forecast?" I think that's succinct: the story of our origins, "The fate of the winners and losers, / The game of chance is set in play" Thanks to your wishes to be happy, the luck of the ones who are chosen by destiny, who will win and who will lose or will more fortune and glory follow the great fortunes of the modern times will follow those... Wild West Scenario Generator What's Wild West? It's a combination of a couple of different genres: The genre of simulation games Like 007, 009 or any other James Bond games, in these games you are able to change your character's name, hair, face, etc. The genre of strategy games (like FireEmblem, Shiningforce, and so on) You decide in real life: of what kind of unit you will build, how you will use them, etc. The Wild West game is a mixture of these two genres. Scenario You get a map of the world and you are put in command of one of the two armies (that armies are led by your character). You can gather land as you wish, building your own fort in the field and, with your own tools, conquering your opponent army. You can use your heroes as warriors or barbarians, you can send them to train in another city, and you can build your own branch of an army. At any time you can use your hero in battle. You can conquer your

enemies and you can lose the battle!

Strategy You need two kinds of armies: a legion and a complement. A legion is composed by 3 units: infantry, cavalry, and a headquarters. Your complement is composed by 4 units: Infantry, Cavalry, Artillery and Headquarters. The legion's perks are mixed by the complements and by the different variants of the medieval armors. The legion perks are related to their high cost. The complements perks are related to a combination of the command points in battle, warriors and siege units.

Mountain Mountain is a very important terrain to conquer. The game is played on the map, and if your army do not conquer the Mountain territories, it will not be able to move. Mountain has the following advantages:

- Experience Bonus There is a total experience bonus of 5 points
- The enemy is penalized with 2 points
- The captured enemy team points is added to your own points, depending on the ratio of the victory.

Experience increase occurs

every time the enemy is defeated. Mountain has the following disadvantage: Camping Cost and Attack Performance In your camp there are only sieges, artillery units
